PARTNER CASE STUDY: Mr PC Advanced IT Solutions

KEY FACTS

Industry:
IT

Location:
Australia

Contact:
Travis Trayhern,
Managing Director at Mr
PC Advanced IT Solutions

www.mrpc.com.au

Mr PC is an Australian-owned IT company based in Melbourne, which specialises in IT services to small and medium businesses. The firm aims to provide a professional and complete solution, which maximises competitiveness while also keeping the costs of IT requirements in check.

THE CHALLENGE

The team at Mr PC operates on the fundamental belief that any company should be able to harness the power of business server and network management solutions in a cost-effective way to gain a competitive edge.

As part of its comprehensive IT services portfolio, Mr PC offers disaster backup solutions, which in the words of managing director Travis Trayhern should include:

"Industry-leading backup media and techniques, to provide the most cost-effective, reliable and efficient solution possible."

ALTARO

THE SOLUTION

Mr PC ultimately chose Altaro as the preferred backup service to offer their clients. Among the factors that led them to this choice were: the option of making onsite backups with offsite drive rotations and cloud backup features; the granular restore function for Exchange; and the affordable pricing model.

As Travis says:

"When we started implementing Hyper-V environments, we were looking for a solution that catered for our needs rather than having to run backups within each VM."

THE BENEFITS

Thanks to Altaro VM Backup, Mr PC could benefit from having a central control for VM backups in the entire server, as well as offsite location backups.

Altaro VM Backup is an easy to use, fast and powerful backup solution for Hyper-V that doesn't require complex configurations to set up, offering all the features needed by businesses at a fraction of the price.

"Altaro works a treat.
It has never let us down."
